COVID-19 Coalition

# Emerging SARS-CoV-2 Variants: *What You Need to Know*

LIVE WEBINAR

Tuesday, January 26, 2021

6 PM ET • 3 PM PT

B.1.351 in South Africa. B.1.1.7 in the United Kingdom. These emerging coronavirus variants, some billed as more contagious forms of SARS-CoV-2, have dominated reports as they popped up across the globe within the last couple months.

Genetic mutation is anticipated, especially for RNA viruses as they multiply, but at what point should clinicians and the scientific community become concerned? With a novel pathogen like SARS-CoV-2, there are still many unknowns.

How did these variants emerge? Are they indeed more transmissible? Do they cause more serious disease? What does the scientific evidence support? What should the public response be? Will the developed vaccines provide coverage against these variants?

Join us for a live MJH Life Sciences™ COVID-19 Coalition webinar event, **"Emerging SARS-CoV-2 Variants: What You Need to Know,"** for an

enlightened conversation with a panel of frontline thought leaders, including experts in virology, epidemiology, and immunology, hosted by Dr. Carlos del Rio.

### **About MJH Life Sciences™ COVID-19 Coalition**

Springing from MJH's mission to improve quality of life through healthcare communications, education, and research, the MJH Life Sciences™ COVID-19 Coalition was formed to help keep healthcare professionals up-to-date and informed on the science and latest learnings on COVID-19.

Leveraging our relationships with top thought leaders across a variety of key specialties, the Coalition generates the most accurate, up-to-the-minute information on the pandemic's ever-evolving impact on healthcare professionals and the patients they treat.

Join us for bi-weekly webinars with discussion, viewpoints, and audience Q&A, and an array of insight pieces on key COVID-related topics.

For more information on the MJH Life Sciences™ COVID-19 Coalition, visit [mjhlifesciences.com/covid19-coalition](https://mjhlifesciences.com/covid19-coalition).
